Apples

Liveland Raspberry, Salome, Anisim, Malinda, Red Wing, Hibernial, Longfield, Okabena. Same prices as apples in catalog price list.

Description of Special Varieties

LIVELAND Absolutely the most valuable early apple, succeeds everywhere. Clear waxen white, striped and marbled crimson. Splendid beauty and fine quality, combined with earliness and large size, make it the most popular early summer variety. Tree extremely hardy, healthy, vigorous and long-lived; blooms late and is blight resistant. Bears very young, an ideal filler. No apple of its season one half so valuable. Excels Transparent; better tree, longer lived; in all regions should be planted commercially, packed in baskets and shipped by the carload. Early apples are great money makers. Origin, Russia.

ANISIM—Tree hardy. Fruit dark red, medium size and of good quality. Very juicy. Season, October to January.

Anisim Apple

HIBERNAL—Our hardiest tree. Fruit large and especially fine for cooking. October to December. Best for top grafting as it is extremely hardy.

LONGFIELD Fruit medium-sized, yellowish with blush, choice for eating and home use. Early, heavy annual bearer. October to January.

MALINDA Best winter keeper. Will keep until June in good cellar. Quality good, late bearer. Extra hardy and bears heavily.

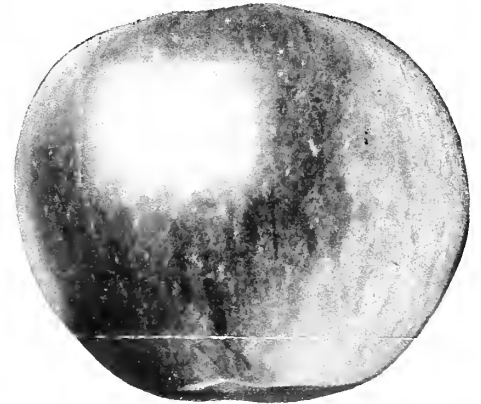

SALOME Shaped like Malinda, ovate, color is red. An all winter keeper, good quality. Tree very hardy and dependable. Makes fine tree.

RED WING—One of the Perkins seedlings. Beautiful red apple. A seedling of Malinda. Keeps as long as Malinda and has all its better qualities.

OKABENA—Very hardy. Early and heavy bearer. Quality good. September.

HAARALSON—The wonderful large red winter apple, originated at the Minnesota Fruit Breeding Farm. An early bearer, yielding heavy crops. Keeps until May in common storage.

Malinda Apple

CRAB APPLES

VIRGINIA—September, fruit of medium size. A vigorous tree. Fruit fine for canning.

EARLY STRAWBERRY—Early August, a well known crab. A favorite for small orchard. Small red and fine for preserving and canning.

SWEET RUSSET—Hardy, rather slow spreading grower, early and good bearer. Fruit large yellow; ripens in September and keeps a long time. Fine for eating.

Sweet Russet, Strawberry and Virginia Crab. See Catalog Price List for prices.

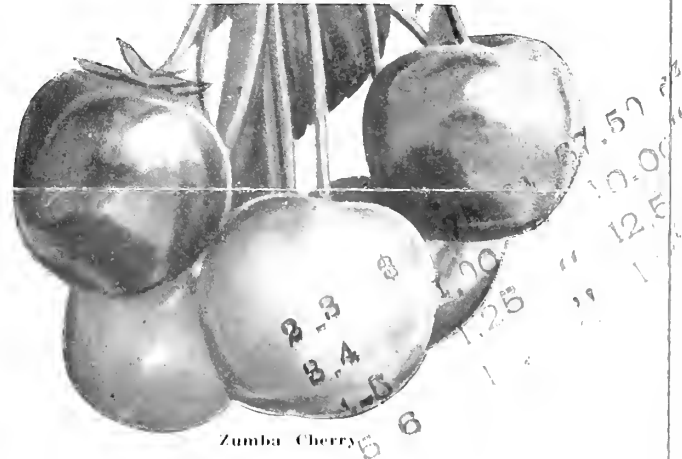

Cherries

ZUMBRA CHERRY—The new Minnesota Cherry, large purple black, sweet cherry. Bears the second year. Grows and bears best in low bush form. This is an advantage. You can cover it with netting to protect fruit from birds. Fruit sells at high prices. Plant your orchard now.

Pears

The Mendel Pear

The only real hardy, blight-proof pear of excellent quality. Read the booklet "The Mendel Pear." We have only 50, 2 to 3 ft. trees left, 100 of the 18 to 24 inch and 100 of the 12 to 18 inch. Save money by investing in these small size trees now. By this coming fall they will equal a \$3.50 tree, as the larger size trees will be that price this fall. The price of the Mendel is steadily going up as the demand for it increases. We could sell 10,000 of the large size trees right now if we had them. We have many orders a year in advance for the larger size trees. Make your reservation NOW. Ask for our Special Advance Prices on the Mendel and place your order for fall 1926 or spring 1927 and get a bargain price. Following prices for the small trees now on hand: Not more than a dozen of a size to a customer.
